# Versatile Diesel Engine Street Sweeper Vehicle With High Pressure Washing

### **Basic Information**

Place of Origin: Hubei
Brand Name: Dongfeng
Certification: ccc
Minimum Order Quantity: 1
Price: 32700\$

Packaging Details: nude with waxingDelivery Time: 30-35 working days

• Payment Terms: L/C, T/T, Western Union, D/P, D/A

• Supply Ability: 50 units per month

### **Product Specification**

• Name: Road Sweeper 3000 Liters • Water Tank Capacity: • Braking System: Air Brake • Steering Type: Power Steering • Transmission Type: Manuel . Cabin Type: Single • Max Speed: 100 Km/h • Gross Vehicle Weight: 7360 Kg • Engine Power: 120 Hp YC4FA120-33 Model: • Engine Type: Diesel . Hopper Capacity: 2500 Liters . Clean Width: 2500-3000 Mm . Sweeping Width: 3.5 Meters • Max Clean Capacity: 30000 M2/h

## **Product Description**

Powerful and Versatile Road Sweeper Truck with High Pressure Washing

High pressure washing and sweeping truck.

#### 1. Working principle of washing and sweeping truck

The cleaning and sweeping vehicle combines the functions of a road sweeper and a high-pressure cleaning vehicle. Generally, it comes standard with two center mounted brushes (equipped with a V-shaped high-pressure water spray rod in front of the brushes) and a center mounted suction nozzle (with a built-in high-pressure water spray rod). The washing and sweeping vehicle sprays high-pressure water from the high-pressure water spray rod during operation, which can flush stubborn

attachments on the road surface. The water and garbage are sucked into the garbage bin together with the suction nozzle. Due to the high water consumption of the washing and sweeping vehicles during the operation, the water tank is relatively large. Therefore, the washing and sweeping vehicles are all modified from chassis with a wheelbase of 3800 mm or more. The washing and sweeping vehicle is equipped with a 17 meter high-pressure water flushing reel and a high-pressure water gun, making it more convenient and efficient to clean roads, sidewalks, and small advertisements.

#### 2. Applicable environment for washing and sweeping truck

The cleaning truck has good cleaning effect and convenient maintenance, and is suitable for mechanized cleaning, sweeping, spray dust reduction and other cleaning operations of urban roads, highways, squares, airports, docks, tunnels, bridges, separation walls, curbs and curb facades.

The suction nozzle body can be moved with the oil cylinder to control the lifting of the suction nozzle. The suction nozzle is equipped with a long spray rod with a high-pressure nozzle (8 nozzles), and the suction nozzle body follows the road surface. Hydraulic driven electrical automatic control suction nozzle lifting, spring floating suspension.		
Straw diameter Straw brand Traveling wheel be Wear resistant oute wheel Working state: rigic	aring er ring of walking	between the rear wheels of the chassis vehicle, consisting of a suction nozzle, a roller, and a suction pipe. The suction nozzle body can be moved with the oil cylinder to control the lifting of the suction nozzle. The suction nozzle is equipped with a long spray rod with a high-pressure nozzle (8 nozzles), and the suction nozzle body follows the road surface. Hydraulic driven electrical automatic control suction nozzle lifting, spring floating suspension.		
Straw diameter Straw brand Traveling wheel be Wear resistant oute wheel	aring er ring of walking d part of suction	between the rear wheels of the chassis vehicle, consisting of a suction nozzle, a roller, and a suction pipe. The suction nozzle body can be moved with the oil cylinder to control the lifting of the suction nozzle. The suction nozzle is equipped with a long spray rod with a high-pressure nozzle (8 nozzles), and the suction nozzle body follows the road surface. Hydraulic driven electrical automatic control suction nozzle lifting, spring floating suspension.		

Other configurations		
Alarm system (optional)	Reverse voice alarm system	
Secondary operating system	The rear electrified control operating system controls the lifting and lowering of the trunk and the opening and closing of the rear door, avoiding safety accidents caused by the user's inability to observe the rear situation while operating in the cab	
Manual pump emergency lifting system	If the auxiliary engine malfunctions causing the hydraulic system to become unusable, and the brushes, suction cups, and trunk cannot be lifted or lowered, a manual pump emergency lifting system can be used for operation.
