

10 TONS DONGFENG EURO 6 DIESEL ENGINE REFRIGERATED VAN

Our Product Introduction

for more products please visit us on hbitruck.com

Basic Information

- Place of Origin: Hubei
- Brand Name: Dongfeng
- Certification: ccc
- Minimum Order Quantity: 1
- Packaging Details: nude with waxing
- Delivery Time: 15 working days
- Payment Terms: L/C, T/T, D/P, Western Union
- Supply Ability: 50 units per month

Product Specification

- Name: Refrigerator Van Truck
- Drive Model: 4x2
- Box Dimension: 5000x2200x2200 Mm
- Wheelbase: 3800 Mm
- Loading Capacity: 10 Tons
- Lowest Temperature: -15 Cent Degree
- Tire: 8.25R16
- Transmission: 6/1
- Power Steer: Yes
- Air Condition: Yes
- Highlight: **DONGFENG REFRIGERATED VAN, EURO 6 DIESEL ENGINE REFRIGERATED VAN, 10 TONS REFRIGERATED VAN**

Product Description

10 TONS DONGFENG EURO 6 DIESEL ENGINE REFRIGERATED VAN

Refrigerated truck

A refrigerated truck is a closed box type transport vehicle used to transport frozen or fresh goods. It is a specialized refrigerated transport vehicle equipped with a refrigeration unit and a polyurethane insulated compartment. It is commonly used to transport frozen food (refrigerated truck), dairy products (dairy transport truck), vegetables and fruits (fresh goods transport truck), vaccines and drugs (vaccine transport truck), etc.

Structure

A refrigerated truck is composed of the walking part of a dedicated vehicle chassis, as well as insulation and thermal insulation compartment (usually made of polyurethane material, fiberglass, color steel plate, stainless steel, etc.), refrigeration unit, temperature recorder for refrigerated trucks inside the compartment, and other components. For vehicles with special requirements, such as meat hook trucks, optional accessories such as meat hooks, waist guards, aluminum alloy guide rails, ventilation ducts, etc. can be installed.

Manufacturing Technology of Refrigerated Carriage Body

1. The "sandwich" panel adhesive type assembled in pieces is currently used by large refrigerated truck manufacturers in China, and the refrigerated trucks produced using this technology have high thermal insulation performance.
2. Injection foam type assembled in sections.
3. The overall skeleton is injected with foam.
4. Vacuum adsorption adhesive

Classification of refrigeration units:

Refrigeration units are divided into non independent refrigeration units and independent refrigeration units. Domestic and imported units, etc. Most car models use external refrigeration units, while a few micro refrigerated trucks use internal refrigeration units. For refrigerated trucks with lower temperature requirements, a built-in cold plate (equivalent to an evaporator) can be used in the compartment.

Classified by chassis carrying capacity: micro refrigerated truck, small refrigerated truck, medium refrigerated truck, large refrigerated truck

Classified by carriage type: bread refrigerated truck, box refrigerated truck, semi-trailer refrigerated truck
Important equipment

Refrigerated truck refrigeration unit

Refrigerated truck refrigeration unit: an important equipment that provides a continuous supply of "cold" for refrigerated truck containers. It is usually installed at the top of the front of the container and has an air conditioning like appearance, but has stronger cooling capacity than air conditioners of the same volume.

Refrigeration units are generally divided into two types: independent units and non independent units. The difference is that independent units rely entirely on another unit to generate electricity and maintain operation, while non independent units rely entirely on the engine operation of the entire vehicle to drive the cooling work of the unit.

Selection of refrigeration units for refrigerated trucks.

Generally, different power refrigeration units are selected based on the volume of the refrigerated compartment and the temperature requirements of the transported goods.

Main Technical specification

Euro 6 Dongfeng Refrigerator Truck	
Overview	
Name	Euro 6 Dongfeng Refrigerator Truck
Dimension (LxWxH)	6995x2450x3500(mm)
Total Mass	12500Kg
Rated Payload	8000Kg
Kerb Weight	4500Kg
Passenger	3
Approach/Departure Angle	20/12
The Parameters of Chassis	

Manufacture/Model	Dongfeng/EQ1125SJ8CDC
Driving Type	4*2 left hand drive
Wheel Base	3800 mm
Gearbox	Seven speed lever with six speed forward and one reverse, manual
Front/Rear Track	1903,1770/1640(mm)
Tyre	825R20
The Number of Tyre	6+1 (spare tyre)
Front/Rear Suspension	1130/1810(mm)
Leaf Spring Number	8/10+7
AC,Power Window,Central Locking,Power Steer,etc.	Equipped
The Parameters of Engine	
Manufacturer/Model	Yunnei/D25TCIF1
Rated Power	150hp/110kW
Fuel Type	Diesel oil
Displacement/Capacity	2500ml
Emission Standard	Euro 6
Cylinder	Straight/4/turbo/electric common rail/HEGR+DOC+DPF+SCR+ASC
Max. torque	400N.m
Velocity	3000rpm
The Parameters of Equipment	
Color/LOGO	Customizable
Box Internal Dimension	5100x2200x2300(mm)
Material	Sandwiched PUF with internal stainless steel and external fiberglass
Thickness	8 cm
Floor	Checked aluminum
Skeleton	Aluminum
Doorframe and locks	Stainless Steel
Electrical Standby with Compressor	Equipped
GPS	Equipped
Refrigerator Unit	-18 degrees
