Product Description

4X2 DONGFENG EURO 6 DIESEL 126HP 6000 LITERS GASOLINE FUEL TANKER WITH DISPENSER

Tank trucks/fuel trucks/oil trucks are mainly used for the transportation of various light fuels, heavy oils, edible oils, etc. in the petrochemical sector. It can be used for sucking oil, pump oil, carrying different oil products. The design can realize the functions of pumping in and out of the meter, self-flowing through the meter, not through the meter.

The tank trucks modified and produced by our company are all modified with domestic mature original chassis, and users can also bring their own chassis.

Our Product

Tank material: carbon steel, stainless steel, steel lined plastic, aluminum

Tank type: square, oval, round

Oil pump: self-priming pump, gear pump, chemical pump, stainless steel pump

Oil meter: single count, double count, tax-controlled fuel dispenser

Function: It can be independently divided into compartments, and can be divided for different oil products, chemicals, and food

All tank trucks can be designed as chemical trucks.

Tanker trucks can be equipped with computer fuel dispensers.

Wide range of tonnage options for tank trucks to meet user needs.

The tank body of the oil tanker is equipped with multiple wave-proof baffles. The high-pressure gas leak test is adopted to make the tank body have the characteristics of high strength for safe and stable transportation.
